Journal of Non-Crystalline Solids 102 (1988) ix–xi
North-Holland, Amsterdam

CONTENTS

Preface vii
Contents ix

Section 1. Water and glass, durability, and transport phenomena

Glass–water interactions (*Invited paper*)
Scholze, H. 1

Hydrogen analysis of soda-lime silicate glass
Schnatter, K.H., R.H. Doremus and W.A. Lanford 11

Stability of arsenate glasses: resistance of hydrolysis
Bruce, A.J., L.G. van Uitert and W.H. Grodkiewicz 19

Effect of water content and alumina additions on the transformation range properties of $Na_2O–3SiO_2$ glasses
Jewell, J.M. and J.E. Shelby 24

Defects of O^+ implanted silicate glass and reactions with water
MagGregor, A.I. and R.K. MacCrone 30

Ion beam sputtering of silicate glasses and oxides
Bach, H. 36

Estimation of the enthalpies of formation for leached subsurface layer materials from ion beam sputtering and analysis
Bach, H. 43

Field assisted transport of Na^+ ions, Ca^{2+} ions and electrons in commercial soda-lime glass I: Experimental
Krieger, U.K. and W.A. Lanford 50

Diffusion of major and trace elements in compositionally complex Cl- and F-bearing silicate melts
Baker, D.R. and E.B. Watson 62

Section 2. Mechanical stability

Mechanical stability of oxide glasses (*Invited paper*)
Kurkjian, C.R. 71

Failure of fused silica fibers with subthreshold flaws
Jakus, K., J.E. Ritter, Jr., S.R. Choi, T. Lardner and B.R. Lawn 82

Thermal healing of cracks in glass
Hrma, P., W.T. Han and A.R. Cooper 88

Effect of ammonia on static fatigue of silica glass
Wakabayashi, H. and M. Tomozawa 95

Effect of coating on fatigue behavior of optical fiber
Wei, T. and B.J. Skutnik 100

Enhanced strength and fatigue resistance of silica fibers with hard polymeric coatings
Clarkin, J.P., B.J. Skutnik and B.D. Munsey 106

The elastic properties of glass reinforced dental composites
Singh, S., J. L. Katz, J. Antonucci, R.W. Penn and J.A. Tesk 112

Section 3. Phase stability, uncommon glasses

Phase stability of glasses (*Invited paper*)
Turnbull, D. 117

Crystallization of lithium alumino/galliosilicate glasses
Higby, P.L., J.C. Lapp and J.E. Shelby 125

Crystallization kinetics of amorphous Si/SiO_2 superlattice structures
Persans, P.D., A. Ruppert and B. Abeles 130

Crystallization of glasses in the system $BaO–TiO_2–B_2O_3$
Bhargava, A., J.E. Shelby and R.L. Snyder 136

Stability and crystallization of lead halosilicate glasses
Coon, J., M. Horton and J.E. Shelby 143

Adiabatic nucleation and glasses
Meyer, E. 148

Phase separation in lead containing fluorozirconate glasses
Boehm, L., K.-H. Chung and C.T. Moynihan 150

Stability of Al_2O_3-containing droplets in glass melts
Runge, S. and G.H. Frischat 157

Vaporization of zirconium fluoride glasses
Mathew, J. and R. Doremus 165

Preparation and properties of oxynitride glasses made from $27R_2O \cdot 20BaO \cdot 3Al_2O_3 \cdot 50P_2O_5$ glass
Rajaram, M. and D.E. Day 173

Nitrogen doping of fused silica and silicate glasses: a study of transport and optical properties
Schroeder, J. and J.J. Jarek 181

Hydrogen-containing glass and gas-ceramic microfoams: Raman, XPS, and MAS–NMR results on the structure of precursor $SiO_2–B_2O_3–P_2O_5$ glasses
Dickinson, Jr., J.E., B.H.W.S. de Jong and C.M. Schramm 196

Section 4. Structural stability

Structural instability and relaxation in liquid and glassy phases near the fragile liquid limit (*Invited paper*)
Angell, C.A. 205

Structural relaxation of lead silicate glass
Crichton, S.N. and C.T. Moynihan 222

Structural stability of chalcogenide glasses
Yi, J.J.L. and P.R. Strutt 228

Fictive pressure effects in structural relaxation
Gupta, P.K. 231

Inelastic light scattering in halide and oxide glasses: intrinsic Brillouin linewidths and stimulated Brillouin gain
Schroeder, J., L.G. Hwa, G. Kendall, C.S. Dumais, M.C. Shyong and D.A. Thompson 240

A gradient energy formalism for the nonexponential structural relaxation kinetics
Gupta, P.K. 250

The effects of thermal treatment below the glass transition temperature on the refractive index of optical glass
Jochs, W.W., H.J. Hoffmann and N.M. Neuroth 255

Glass transition related to ionic distribution in amorphous media
Hara, M. 259

Section 5. Gel-derived glasses, optical properties

Stability of solutions, gels and glasses in the sol–gel glass synthesis (*Invited paper*)
Sakka, S., H. Kozuka and T. Adachi 263

Crystallization of lithium aluminosilicate gels
De Lambilly, H. and L.C. Klein 269

Microstructural studies of leached TiO_2–SiO_2 gel
Makishima, A., K. Shingyouchi, Y. Kitami and M. Tsutsumi 275

Electro-optical DC Kerr effects and solid state deuteron NMR studies of stable gel-derived glass–organic polymer composites
Che, T.M., R.V. Carney, G. Khanarian, R.A. Keosian and M. Borzo 280

Luminescence induced by low energy electron deposition in Suprasil and Spectrosil glasses
Wang, P.W., R.F. Haglund, Jr., D.L. Kinser, M.H. Mendenhall, N.H. Tolk and R.A. Weeks . . . 288

Optical studies of glass stability in fluoride glass systems: Intrinsic Rayleigh scattering
Schroeder, J., V.G. Tsoukala, G.A. Floudas and D.A. Thompson 295

Author index 303

Subject index 306
